

TARONGA TEACHERS' ASSOCIATION EVENT FLYER

HABITAT CLASSROOM TOUR

Saturday 6 April 2019

These spaces combine cutting edge technology and animal exhibits, giving students a unique opportunity to interact with wildlife. The living classrooms provide a transformative experience aiming to inspire students to participate in Science and become conservation champions.

WOODLANDS

Woodland classroom is themed around a native dry Sclerophyll forest. As the natural light dapples through the trees. Students are introduced to animals including birds, ground lizards and small macropods.

DESERT

With its red sand and busy flock of birds, and resident Bilbies, the Desert classroom allows students to be transported to a location that epitomizes Australia. Students enjoy the incredible sounds of the circling finches and roaming lizards.

RAINFOREST

The Rainforest classroom is a sensory overload. The room creates mystery and ensures that animals are not seen upon first entry. Overhead vines provide pathways for the primates to move within the exhibit.

Register Online: <https://taronga.org.au/tta-habitat-classroom-tour>

Time: 10.45am - 11.30am (feel free to explore the Zoo afterwards)

Location: Taronga Institute of Science & Learning. Bradleys Head Road, Mosman NSW 2088
