## 2019 theme - *Birds as Pollinators*

Birds are all around us. In Australia we are spoilt with a rich and an equally fascinating variety of feathered friends taking to the skies. No matter where you are from, or where you live, every day there is an opportunity to connect and see remarkable birds when we take the time to stop and pay attention...

Whilst birds already inspire us with their beauty, they also do a lot for us. Birds have an important role in pollination, which helps ensure humans, and animals have enough food to eat. Whilst the bird is feeding at a flower, when it visits another flower of the same species, it transfers the pollen to that flower. When flowers are pollinated, plants can produce the fruits and seeds that feed other species.

Think about different species of birds that are pollinators and the wild, bright flowers that attract them and use both aspects as your inspiration for Taronga's 2019 QBE School's Banner Competition.

At Taronga, our cause is 'For the Wild'. By caring for the wild we are for ourselves and each other. The 'wild' isn't always a destination far away from where YOU are - the 'wild' can be right in your own backyard!

**Describe your piece of 'Birds as Pollinators' art (50 words or less)**
